

## INTERNATIONAL SEARCH REPORT

International application No.  
PCT/IN 2004/000192

## A. CLASSIFICATION OF SUBJECT MATTER

IPC<sup>7</sup>: A61K 9/52

According to International Patent Classification (IPC) or to both national classification and IPC

## B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC<sup>7</sup>: A61K

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

WPI, EPODOC

## C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	US 5681584 A (SAVASTANO et al.) 28 October 1997 (28.10.1997) <i>column 8, claims.</i>	1-24
	--	
X	US 5650169 A (CONTE et al.) 22 July 1997 (22.07.1997) <i>column 6, line 54; claims.</i>	1-24
	--	
X	GB 2140687 A (ALZA CORPORATION) 5 December 1984 (05.12.1984)	1-24
	--	

☒ Further documents are listed in the continuation of Box C.☒ See patent family annex.

\* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&amp;" document member of the same patent family

## C (Continuation). DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
PX	US 2005/0008701 A1 (SRIWONGJANVA et al.) 13 January 2005 (13.01.2005) <i>claims.</i>  -----	1-24

**Continuation of first sheet****Certain claims were found unsearchable:**

Observations where certain claims were found unsearchable

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

Claims Nos.: 1-24 because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:

The only technical features described in claims 1-24 in a concrete manner are the core comprising an active agent and the coating surrounding said core. As there are myriad of formulations showing such a form, no meaningful search report can be established; thus the examiner has decided to carry out a search on the basis on the examples.

Moreover the meaning of claim 24 is not clear. If the term "isolating" should denote "releasing", claim 24 represents a claim directed to a method of treatment, for which a search is generally only carried out on the basis of the alleged effects of the composition.

---

**Continuation No. IV:****Text of the abstract**

**(Continuation of item 5 of the first sheet)**

The present invention provides an oral drug delivery system comprising (a) a core comprising an active ingredient and a pharmaceutically acceptable excipient, and (b) a coating essentially composed of ethyl cellulose surrounding the core.

---
